Web Developer

About the role

You will play an integral role both internally and externally. Specifically, you will be in charge of building and maintaining our website (designatucsd.org), among other websites that are a part of our various initiatives. Furthermore, you will play a key role in helping members of our org become industry ready by facilitating technology education. This includes, but is not limited to, facilitating development workshops and teaching other board members how to maintain the website. This is an opportunity to help bridge the gap between design and development at UCSD, take on new projects, sharpen your development skills, and contribute to the community!

Responsibilities

- Building and maintaining designatucsd.org
- Lead the technology aspects of our various initiatives as an organization
- Work closely with our visual designers to iterate on our products
- Facilitate tech education within board and with general members

Qualifications

- Proficient knowledge in HTML, CSS, and JavaScript
- Knowledge of Github and deployment strategies
- Prior experience using Jekyll or other CMS
- Interest in design and tech education
